

AHM Day is part of an effort designed to increase public awareness of the progress, promise, and benefits of Acupuncture and Traditional Chinese Medicine (TCM). It's a special day for acupuncturists nationwide to share that we are here to heal the world starting with one person at a time.

On a local level, participants in the acupuncture community are hosting various events. Join in, experience, and learn more about acupuncture - the missing key to your health. Plus, it is a great excuse for you to get on the "acupuncture is awesome" soapbox and share our love for Acupuncture and TCM!
